

VAHAB AZIMZADEH SADEGHI

Full-stack Web Developer

ABOUT ME

I am a passionate Full-Stack Web Developer with a background in modern frameworks like Next.js, React, and Tailwind CSS. I studied Web Application Development (DAW) at Ilerna in Barcelona, where I gained solid experience in Java, Spring Boot, MySQL, Vue.js, and PHP. After completing my studies, I continued learning on my own through self-study, focusing on React, Next.js, and TypeScript to strengthen my skills and keep up with the latest technologies. I enjoy working in multicultural environments, learning quickly, and collaborating with teams to turn ideas into functional and user-friendly digital products.

WORK EXPERIENCE

Internship

Mar 2025 - Jul 2025

Empresa Kidson S.L.

- During my internship at Regalexia (Kidson S.L.), I collaborated with the development team on migrating the company's website from WordPress to a React-based architecture. I contributed to building reusable components, integrating APIs, and optimizing performance to ensure a smooth transition. My responsibilities included implementing responsive UI elements, refactoring legacy code, and assisting in adapting the new stack to the company's business requirements.

Marketing Editor and Producer, Real Estate

2023- 2024

Sahel E Aftab S.L. Company

- At this company, I put into practice my skills in producing and editing videos for the company's marketing campaigns.
- I also had the opportunity to learn about the real estate market.

Freelance

2022- 2023

Upwork platform

- I worked on several relatively small projects, but they offered valuable insights into the preferences of each company and culture based on their country. I applied my skills in programming and UX/UI design throughout these experiences.

EDUCATION

- **Higher Vocational Degree in Web Application Development**

Ilerna

2023 - 2025

During my two-year Higher Vocational Degree in Web Application Development at Ilerna, I built a strong technical foundation across both frontend and backend technologies. I gained hands-on experience with Java, developing backend services using Spring Boot, and working with MySQL databases for data modeling and persistence. On the frontend side, I worked with Vue.js to build interactive user interfaces, and also developed projects using PHP for server-side applications. This training allowed me to strengthen my problem-solving skills and apply industry-relevant tools to deliver efficient and reliable web solutions.
